

TOWN OF BRIDGEWATER  
NEW BUILDING COMMITTEE MINUTES  
AUGUST 7, 2018

Draft

Meeting was called to order at 6:00 by Bruce Seely, Vice-Chair

Present: Bruce Maxham, Josh Maxham, Nancy Robinson

Visitors: None

Josh moved to accept the minutes of July 24, 2018 as written. Bruce M. seconded the motion and motion carried.

Greg from Willis Engineering has been working this past week on getting elevations of the field, with the assistance of Ethan from Holt Surveying.

Will continue to do research for proposed building exterior/interior items. Discussion of fuel types, appears that this committee is leaning toward propane. Barnard's new station has 2 (alternate) propane tanks, buried underground. Josh would like to look at ventilation systems for the fire truck bays.

Need to look at items not necessarily by cost but by sustainability and long-term care and maintenance.

Bruce S. will get in touch with Greg at Willis Eng. to make sure he is communicating with NBF. Next steps by Willis Eng. should be the ground borings.

Next meeting will be on August 28<sup>th</sup>.

Being no further business, meeting adjourned at 6:58 pm.

Respectfully submitted,

*Nancy Robinson*
