

Fill or Debris Material

Often when cleaning ditches and working around bridge sites, the town accumulates “debris or fill” material that can be used for general fill. Depending on the area of town that we are working on, we would be happy to dump “debris or fill” material at your property. We will not truck “debris or fill” material to a property on the opposite end of town.

If you would like to receive any of this material, please let us know by contacting the town office at 672-3334 or by leaving a message on the town garage phone at 672-5379. You can also email your request to the town at twnbridg@comcast.net.

Important note: When using “debris or fill” material, please adhere to state and federal laws and regulations governing surface waters and wetlands. Putting “debris” material into classified wetlands or surface waters typically requires a permit to do so. Please visit the Department of Environmental Conservation’s permitting website for more information.
